

# ANAHITA ARIA

Senior Product Designer | AI-Native Designer with an Engineering Mind

Milan, Italy | Open to relocation: Berlin, Germany

[aanahita.aaria@gmail.com](mailto:aanahita.aaria@gmail.com) | +39 345 6916 | [LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Senior Product Designer with 6+ years of experience leading design for complex fintech, enterprise, and most recently, crypto/DeFi products serving both institutional and retail users. With a Master's in Artificial Intelligence and a Bachelor's in Software Engineering, I have a deep understanding of how engineers think and build, allowing me to bridge design and development, including translating Figma designs directly into code with AI tools like Claude and the Figma MCP server. Track record of building design systems from scratch, leading a team of 4 designers, and shipping 10+ products across 7+ industries. Currently seeking Senior Product Designer roles at fintech or crypto scale-ups in Berlin.

## CORE SKILLS

### DESIGN

- Product Design
- Information Architecture
- UX/UI Design
- Wireframing
- Design Systems
- Prototyping
- Interaction Design
- Responsive Design

### RESEARCH & STRATEGY

- Competitive Audits
- User Research
- Usability Testing
- User Flows
- User Interviews
- Journey Mapping

### TECHNICAL

- AI-Powered Design (Claude, KlingAI)
- Storybook
- Design-to-Code
- Git
- Figma
- Tokens Studio
- Figma MCP Server
- Miro/FigJam

## PROFESSIONAL EXPERIENCE

### MORS | Senior Product Designer

January 2024 – Present | Milan, Italy (Remote)

*Specialized technology firm at the intersection of high-frequency trading and blockchain infrastructure, building institutional entry into DeFi.*

- Lead end-to-end product design across two flagship DeFi products serving institutional investors (hedge funds, professional traders) and sophisticated retail users.
- Built the design system from scratch (0→1) for the first flagship product, establishing a token-driven foundation via Tokens Studio (typography, color, spacing) and architecting a customized component library on top of the team's frontend library ([Shadcn](#), [HeroUI](#), [Radix](#)) and [Chart.js](#), ensuring 1:1 Figma-to-code mapping.
- Joined the second product mid-build, audited and consolidated 20–50 inconsistent components, and unified both products under a single design language, bringing cross-product consistency without disrupting ongoing delivery.
- Shipped 40+ design system components from Figma directly to code using Claude (AI-assisted development) and the Figma MCP server, deployed to the team's Storybook, reducing component implementation time from ~2 weeks to 1–2 days (~80% faster design-to-development handoff).
- Designed 10+ major user flows for complex DeFi primitives including vault automation, governance, and rebasing yield mechanisms, translating highly technical financial logic into interfaces accessible to both institutional operators and retail users.
- Mentor a fellow designer on the team, and guiding them through complex DeFi UX challenges.

### Neperia Group | Product Designer

September 2023 – February 2024 | Italy (On-site) | Contract

*20-year-old Italian IT company specializing in software intelligence and digital transformation.*

- Joined as the sole designer to modernize 3 enterprise products in 6 months, spanning distinct domains: agro-trading SaaS (TradeUp), business operations management (Managy), and legacy IT / software intelligence (KPS).
- Redesigned 60–100 screens across the 3 products, from discovery to high-fidelity UI and engineering handoff.
- Built the design system from scratch for TradeUp, implementing and customizing 20–40 Radix-based components in Figma, with typography, color tokens, and spacing scaled across the product.
- Consolidated fragmented design patterns across multiple products into a cohesive design language, improving consistency and reducing design/development overhead.
- Redesigned complex, data-heavy enterprise interfaces: contract management, warehouse logistics, invoicing dashboards, and reporting tables.

#### **Max Holding** | *Senior Product Designer → UI/UX Team Lead*

November 2022 – January 2024 | Dubai, UAE (Remote from Oct 2023)

*Holding company operating across insurance, crypto, automotive, and food delivery industries.*

- Joined as Senior Product Designer; promoted to UI/UX Team Lead in October 2023, formally managing a team of 4 designers (performance reviews, 1-on-1s, hiring input).
- Contributed to 5 product launches across 5 industries, insurance, crypto, automotive, food delivery, and media asset management.
- Led design for Azki, a B2B2C insurance platform connecting back-office operators, insurance sellers, and end users through three coordinated interfaces (admin panel, seller panel, back-office panel).
- Delivered measurable business impact on Azki:
  - Insurance sales conversion increased from 20% to 60% ( $\approx 3\times$ ).
  - B2B back-office adoption reached 70%, replacing legacy operational workflows.
  - User error rate reduced from 40% to 10%.
- Designed a digital platform for automotive dealerships, streamlining inventory management, customer interactions, and sales workflows.

**Note:** Transitioned to freelance/consulting arrangement from October 2023 during relocation to Italy.

#### **Arsh** | *Mid-Level Product Designer*

October 2021 – November 2022 | Remote (Lausanne, Switzerland)

*Tech product company building digital products across multiple domains including music and civic tech.*

- Joined as solo designer, owning end-to-end design for 3 products: a music collaboration & social platform, Bamano (a parenting social media app), and a citizen services / civic tech app.
- Led end-to-end redesigns (from discovery to high-fidelity UI) of products serving fundamentally different user bases (creative communities, parents, and everyday citizens).
- Conducted competitive audits to benchmark patterns and identify opportunities in each product's domain.

## **EDUCATION**

---

**Master's Degree in Artificial Intelligence** | Kharazmi University | 2020 – 2022

**Bachelor's Degree in Software Engineering** | Shahid Chamran University of Ahvaz | 2014 – 2018

## **PUBLICATIONS**

---

**ResViT: A Hybrid Model for Robust Deepfake Video Detection** | IEEE International Conference CSR 2025 | [Published](#)

## **LANGUAGES**

---

**English:** Fluent (professional working proficiency)

**Persian / Farsi:** Native

**German:** Beginner (actively learning)
